Dr M. Friedman,

I am writing in regards to the lack of labels on genetically engineered food.

I think the people of America have the right to know if the food they are eating has been genetically engineered. I don't think we have collected enough information on this subject to just let it go unregulated. I think it is like introducing a new species to an ecosystem often, or many times when scientist thought it was ok it turned have very bad and far reaching impacts.

Again I think it is our right.

Thank you very much have a nice day

Michael Richardson
